PROJECTS

Personal Finance Management App

📅 07/2024 - Present 📍 Plovdiv, Bulgaria

🔗 <https://github.com/todor-savov/Expense-Tracker>

Allows users to register transactions, attach receipts, and edit entries. It features a dynamic table with filtering and sorting options and users can visualize their finances with pie charts and graphs. Budgeting and tracking monthly limits are also supported.

Technologies used:

- React, JavaScript, TypeScript, Material UI, Firebase

Dynamic Event Scheduling Web App

📅 05/2024 - 06/2024 📍 Remotely

🔗 <https://github.com/React-Duo/Event-Calendar>

A feature-rich event calendar web app for managing and organizing personal events daily, weekly, and monthly. The app enables event creation, invitations, and seamless collaboration, with admin functionality for managing users and events.

Technologies used:

- React, JavaScript, Google Firebase Realtime database (NoSQL), HTML, CSS

Online Discussion Forum for React Enthusiasts

📅 05/2024 - 05/2024 📍 Remotely

🔗 <https://github.com/React-Duo/Forum-Project>

A dynamic and responsive forum application with an intuitive user interface, real-time data synchronisation and secure user authentication with Firebase.

Technologies used:

- React, JavaScript, Google Firebase Realtime Database, HTML, CSS

GIF Search and Browse Site

📅 04/2024 - 04/2024 📍 Remotely

🔗 https://github.com/Cyber-Creators/WebProject_1

Developed a Giphy website using vanilla JavaScript and the Giphy API to showcase trending GIFs. The site allows users to upload and favorite their own GIFs, with local storage functionality to manage favorites and enhance the user experience.

Technologies used:

- vanilla JavaScript, browser localStorage API

Remote Resource Monitoring Desktop App

📅 04/2018 - 02/2019 📍 Remotely

Created a client-server network app for admins to monitor CPU, RAM, and disk usage of remote Windows computers via a platform-independent UI. It helps with decision-making for upgrading or replacing LAN resources.

Technologies used:

- Java, MySQL

STRENGTHS

Commitment to stay long-term

I have worked for nearly 11 years at the same company (SiteGround) which is a sign of my loyalty and commitment to stay long-term with a company that appreciates my contributions and values both my skills and personal qualities.

Playing for the team

I enjoy working and sharing my knowledge with other people, which brings me a strong sense of fulfilment and is a major source of satisfaction for me. I believe that is something I am born with (never had to learn it). I don't see my success separate from my colleagues' own success.

Continuous self-improvement

I consistently invest time to expand my knowledge and skills, which reflects my strong commitment to self-improve, a quality that I would bring to my future role as well.

PASSIONS

Basketball

I enjoy playing basketball in my free time, shooting from the three-point line—it's a challenge I love to take on just for fun.

Learning Foreign Languages

I find great joy in learning new languages and love to speak with people from different cultures. I'm fluent in English and Spanish and look forward to expanding my German language skills further.
